WeatherMaster® Enclosure Outfitted with Midnight/Magnetic Stone Sunshades

SunShades

28 years of creating rooms meant to enjoy the sunshine, there is a certain irony in creating a product intended to control it. At Sunspace we know that sunroom owners enjoy their indoor/outdoor family spaces and sometimes want the added comfort and privacy of adjustable shade. So we came up with a solution.

Like "Sunglasses" for your windows, Sunshades are custom fit to your sunroom, block harmful U.V. rays and unwanted light. These are ideal for media rooms, studies or any sun-facing room where sun or glare control is desired.

When ordered with a new sunroom, there is no additional measurements needed! Your sunshades will be custom sized to suit your widows, delivered alongside your new sunroom and installed by factory professionals.

Available Sunshade Colors

Model 200 Sunroom outfitted with Sable/Shale Sunshades

Sunlight Illuminated Valance

Just because the sun goes down does not mean it's time to pack it up. Weather a late night, early morning or cloudy day, you can further enjoy your out of doors family space longer with a Sunlight Illuminated Valance.

Giving off a warm glow at 3200k is the ambient light that comes from the 12v LED light system. This is almost the exact same light warmth that we receive from the sun, without the added heat or energy consumption of a florescent or incandescent bulb.

Sunlight Illuminated Valences is a cassette system that adapts easily to any size or configuration. Every valance system is professionally installed, custom fit to suit your sunroom and can be attached to standard switches or magnetic dimmers for ultimate illumination control.

Model 200 Sunroom outfitted with White/Sand Sunshades

Model 200 Sunroom outfitted with Midnight/Tan Stone Sunshades

Enjoy your Outdoor space, late into the family time of evening or control the sunlight during the relaxing days. The Sunlight Illuminated Valance will provide indirect illumination of 12 volt LED lighting. Allowing you to enjoy your sunroom past the setting sun. The Sunshades will help reduce and control unwanted brightness as you desire. Giving you the possibility to gain more control over your family time.
